

Table of Contents

S/N	Title and Authors	Pages
1	Graph Modelling of Transaction Networks for Fraud Detection and Systemic Risk Assessment in Nigerian Banks Olaitan Ojo, Olayiwola Babarinsa	1-55
2	Multi-criterion Decision-making Approach to Prioritize Strategies for Combating Smuggling and Border Control Along the North-east Borders of Nigeria Modu Barma, Aliyu Huzaifa Babando, John Justice Emmanuel	56-72
3	A Graph Analysis of Topological Structure in the Bus Rapid Transit Transport Network of Lagos State Olayiwola Babarinsa, Godwin Edime, Emmanuel Dare	73-81
4	Reverse Logistics and Non-Financial Performance: Experience from Selected Manufacturing Firms in Nigeria. John Oluwasayo Ajani, Joseph Olusegun David, James Olalekan Akinbode, Henry Igbezien Inegbedion, Opeyemi Oluseun Oyelude	82-95
5	Adaptation of Artificial Bee Colony Algorithm for Solving Inventory Routing Problem Munu Stephen, Asaju Laaro Bolaji, Moshood Abiola Hambali	96-119
6	Improved Particle Swarm Optimization for Global Optimization with Decaying Adaptive Velocity Limit Huzaifa Aliyu Babando, Mathew Remilekun Odekunle, Nasiru Salihu, Walye Nyubo Kurwizi	120-130
7	Quality Assurance as Individual Responsibility: The Three-Tier Reality of Research Integrity in Nigerian Public Universities Hilary Watsilla	131-144

8	A Comprehensive Review of Machine Learning Techniques for Facies Classification in Oil and Gas Exploration: Methods, Challenges, and Future Directions Mukthar Muhammad Liman, Mahmud Bamanga Ahmad, Basir Liman Tukur	145-160
9	Optimal Control of Typhoid Fever Transmission with Imperfect Diagnosis and Multiple Interventions Blessing Kolawole, Edogbanya Helen, Gyegwe Jessica	161-173
10	Semi-Analytical Solution of Cervical Cancer Model using the Adomian Decomposition Method Abosede Mary Oke, Helen O. Edogbanya, Olayiwola I. Babarinsa, Momoh Shiedu	174-184
11	Gaussian Process-Homotopy Analysis Method for Tuberculosis Transmission With Stiff Dynamics and Time-Varying Contact Rate Obafaiye Pauline Olayemi, Lanlege Daniel Ibitayo, Fatokun Johnson Oladele	185-194
12	Advancing Statistical Model Flexibility through the Development of the Exponentiated Generalized Topp Leone-Fréchet Distribution M. A. Jimoh, U. M. Modibbo, H. A. Jimoh	195-210
13	Towards Real-Time Network Intrusion Detection: An Enhanced Feature Selection Framework Using Variance Analysis and K-Means Clustering U.A.Baba, E. J. Garba, A. S. Ahmadu, M. Lapina	211-234
